Master D Shape

1. The Master D Shape inside height should be slightly less to 2 5/8 inches tall from the 2 7/8 I had you adjust them to.
2. The Master D Shape widest inside dimension needs to be slightly bigger to 5 inches from 4 7/8 inches I gave you originally.
3. The Master D Shape thickness of diameter space between the inside line and outside lines needs to be 1/2 inch wide versus the current width which is slightly less.
